DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Berney in view of Hatuse et al. The Berney reference discloses an electronic watch including hands 1,2 for indicating the time above a dial as seen in Fig. 1, first and second indicators 3,4, respectively, for indicating the units and tens of the date, control member 9-11, and independent motors for driving the indicators (see col. 2, lines 1ff).
2. Berney does not disclose an aperture in the dial through which the indicators appear. However, Hatuse et al discloses a time display with dial 42 having aperture 42a for viewing of indicator 19. One skilled in the art having both references would be taught that an aperture may be provided in the dial of Berney for viewing of indicators 3,4, as shown in Hatuse et al as an alternative to placement of the indicators above the dial.

Art Unit: 2841

Such construction would eliminate the need for insertion of the hand shafts through the dial and the precision required for aligning the hand shafts and dial openings.

3. Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
